STATUS SUMMARY																																																
4	Fresh Beats is a dynamic online platform revolutionizing the music industry by providing a streaming service for music enthusiasts and serving as a catalyst for up-and-coming musicians to gain visibility. While Fresh Beats has successfully carved a niche in promoting emerging musicians, there are strategic imperatives to optimize its operations and further enhance business performance. The key challenges that require attention include: artist promotion effectiveness, user engagement and conversion, and genre promotion for emerging artists. The data will evaluate the effectiveness of current artist promotion strategies and identify factors that contribute to successful promotional campaigns. We plan to enhance user engagement on the platform and convert free users into paid subscribers. We hope to improve the platform's content recommendation system, by tailoring recommendations based on user preferences and music trends to contribute to a more engaging user experience. Our data shows that paid users subscribed more than free users by 171.3% on average, with the highest conversion growth seen in 2018 at 185.5% and 184.7% in 2020.

Recommendation																																																
8	Marketing should try focused campaigns targeting typical demographics for fans of these genres. We should analyze user retention in these genres, and consider how we can maximize it. Product/marketing teams should try experiments to generate leads in alternative genres. It is worth doing deeper research into previous years to understand why pop is on a downwards trend. We should analyze more ways to increase the engagement of rock-listening users, as a potential growth segment.

17	CONCLUSION																																																																																															
18	We should increase our catalogue of tracks in electronic and hip hop music - solicit appropriate artists and offer them deals (time-limited free promotion). Rock is the key genre for free users - we should experiment and research further to see how it can be leveraged to convert them to paid.
